WORK EXPERIENCE

Game Developer Intern
dreamsLAB

📅 September 2023 - December 2023

- Designed and implemented 3D gameplay systems, mechanics, and assets using Unity.
- Created 3D character models, environments, props, textures, materials, and animations.
- Created and implemented 2D and 3D assets, animations, and visual effects within Unity.
- Programmed core gameplay loops, AI behaviors, physics interactions, etc.
- Worked closely with producers and project managers to meet project milestones and deadlines.

PROJECTS

Event and IT Support Coordinator
CS Cups and CS Cup Junior

📅 August 2024 - December 2024

- Supported technical setup and smooth system access for participants during competitions.
- Collected, verified, and managed participant information to ensure data accuracy.
- Developed and maintained clear instructional guides and documentation to assist users.
- Compiled detailed event reports summarizing participation data and trends.
- Updated and managed event websites using online tools, ensuring content accuracy and ease of access.
- Provided timely technical troubleshooting and support for platform-related issues.

Mentor and Support Team
She Can Code | Paragon International University

📅 Nov 2022 – Feb 2023 | Oct 2023 – Dec 2023

MY PROFILE

Independent and self-motivated computer science student with a strong foundation in IT support, troubleshooting, and system operations. Quick learner with excellent English reading and communication skills. Passionate about using technology to solve real-world problems.

EDUCATION

Bachelor of Computer Science
Paragon International University (PIU)

High School Diploma
Chea Sim Santhormok High School

General English Program (GEP)
Australian Centre for Education (ACE)

VOLUNTEER WORK

Technical and Communication
Electric Vehicle Showcase 2024

Flow and Technical Team
Ignite Talks Cambodia

Speaker Care
Youth Light Up Talk - Youth Ambassador (YA)

Technical Team
MISsion Possible - Paragon International University

- Mentored students in mobile app development using Java and MIT App Inventor.
- Taught students to build quizzes, games, and other mobile applications through both block-based coding (MIT App Inventor) and Java programming.
- Guided students in brainstorming and developing creative app ideas, providing both technical and project-based support.
- Created, uploaded, and maintained workshop lessons and documentation, updating materials as needed throughout the program to ensure clarity and accuracy.

IT Support
Cambodia SEA Games

📅 April 2023 - May 2023

- Collaborated with a team of IT professionals to support and maintain the technological infrastructure for sporting events
- Monitored and addressed technical issues, including troubleshooting problems related to servers, network connectivity, and software systems
- Supported the integration of technology for scoring, timing, and data analytics in various sports.

ACHIEVEMENTS

1st Place of Paragon's Hackathon
PIU Hackathon | Topic: PYGAME

📅 June 9th 2023 - June 10th 2023

- Developed a game from scratch using Python and Pygame, incorporating the Sustainable Development goals of the UN.
- Collaborated as a team and effectively divided tasks to improve code readability and enhance the gaming experience.
- Demonstrated a strong grasp of Python and Pygame libraries, resulting in a smooth and error-free game.

Reverse Innovation Cohort 3 Finalist
Techo Startup Center

📅 July 2023 - November 2023

- Selected as one of the top 10 finalist teams in a national FinTech innovation program.
- Collaborated in a team to identify and solve real-world problems in the FinTech sector.
- Developed innovative solutions through research, ideation, prototyping, and iteration.
- Gained hands-on experience in financial technology trends, product development, and startup methodologies.
